

Problem_Statement

Movies on the Tip is an online movie manager whose responsibility is to take care of all the activities a user can do on this portal.

User Stories

1. As a user I should be able to search the movies type:-
 - coming soon
 - Movies in theaters
 - top rated Indian
 - top rated movies
2. As a user I should be able to see all the movie's basic information (poster, title) in the selected options
3. As a user I should be able to see the details of the movie if I select the movie.
4. As a user I should be able to add the movie to the favorite list by clicking on the favorite button
5. As a user I should get the option to view my favorite list.
6. As a user I should be able to remove a movie from the favorite list.

Instructions

1. The JSON data is provided along with the problem statement as a data.json file and the corresponding images are present in the **img** folder, however, you can use a third-party free API as well to get the data.
2. You can choose the UI color combination/buttons and other props of your own choice.
3. Follow the correct naming conventions and folder structure.
4. UI should be responsive, and display proper messages of the operations wherever required.
5. A sample project working demonstration is attached for your reference, however, you can be innovative and create the project in different template structure.
6. You are required to submit the screen recording of the working project, the recorded video will also be a criterion to calculate the final marks. You can attach a drive link of the video along with the solution in a separate text file. Make the drive link public.
